

Providing 42on Remote Access

In order to being able to assist with Ceph Emergencies 42on requires remote SSH access to your systems.

Direct SSH access to systems is the easiest, fastest and preferred login method by 42on.

Send all information to info@42on.com

Subnets

42on has fixed IPv4 and IPv6 subnets where we will connect from.

Whitelist these subnets in your firewall(s):

- IPv4: 79.99.132.144/28
- IPv6: 2a00:f10:13c::/48

VPN

In case a VPN connection is required, send us the VPN informaton:

- Hostname
- Type (OpenVPN, IPsec)
- Credentials
- Certificates

SSH

Using SSH we can remotely log in to your systems and assist, but before we can do so, please make sure that:

- Our subnets (IPv4 and IPv6) have been whitelisted
- We have the proper VPN login credentials (if required)
- We know where to connect to (Hostname and Port)

Our public SSH key:

```
ssh-rsa AAAAB3NzaC1yc2EAAAADAQABAAQGDIEccNoRdBstN3CLo7RCvvo5qlAKaXdKP2w5+fSiR4rUJ3VY
